THE BIG EVENT

The Big Event in Son of Doge's life was his decision to leave his Father's controlling paws and venture out to see what the world had to offer for entrepreneurial pups.

His Father forbade him to leave but he disobeyed him and set out on what he thought was going to be an amazing adventure into a world so far unknown to him.

The future direction of the Son of Doge took a dramatic twist when certain obstacles were blocking his path on what could have been a treacherous journey. During his journey he was betrayed by some of the people he trusted most in life, by turning their back on him when he needed them the most and tried to destroy his journey.

Due to this he learned skills on how to protect himself from enemies and dangerous situations and learned to make decisions on his own. Thankfully, he met a pack of pups who took him under their paws and welcomed him into their community.

They spent many months traveling the world, embracing different cultures and forging new friendships with new communities. Through this adversity they became really close and created relationships and bonds with pups he now calls his Family.

He realized through trust, honesty and transparency that integrity shines through and anything is achievable.

After months apart his Father had been searching for his son, alone. But he had no success.

Eventually, Son of Doge decided to return home to visit his Father to share his experiences and how he had matured as a pup. The journey home was tough, obstacles arose, but being a pack of pups who had each other's paws they made it back with ease.

At the very end, Father and Son of Doge were reunited. Father said, "Son, I searched everywhere for you, but could not find you." Son replied, "Father, I understand you struggled, you acted alone. Working together, sharing tasks, being a part of a community and family, and having complete trust, everything is possible".

The Son of Doge is now part of an ever-growing community. A community with fellow pups which are protecting each other. A safe environment. A safe haven where every one of them is family.

PROJECT OVERVIEW

Son of Doge first and foremost is a community driven project with the sole task of protecting the community, this is achieved by providing a safe environment for all. We aim to be an integral component to the BSC (Binance Smart Chain) stack of applications.

The team behind Son of Doge aims to innovate the BSC by building a project which provides a safe area for investor research, and a fun, entertaining and especially rewarding experience for everyone involved.

Each trade has a small fee deducted to pay for marketing ventures and the further development of the Son of Doge ecosystem.

These ventures are critical, as they allow Son of Doge to reach potential technology and marketing partners to further develop and grow the Son of Doge ecosystem.

THE Son of Doge VISION

Son of Doge is built on trust, honesty and transparency. We believe that these ideals are key to building a strong community, of which we will ensure that our actions and our project relate directly back to them.

2022 is the year that Son of Doge will be recognised by name by everyone in the crypto space. We will achieve this by delivering everything on our roadmap and having the strongest possible community.

To further cement our intent and success of Son of Doge, we have made Son of Doge a Corporation which is registered in Canada. Public information will be available on our website. This immediately allows us to apply for tier 1 exchanges such as Kucoin and Crypto.com and ultimately on Binance.

Having all these attributes can only lead to the success of our project.

Every single holder will have a voice, and we will unite as one to take over! We have solid footings and are built for the years ahead. We will reach a \$1 Billion market cap, and once we do we are just getting started.

Join us!

OUR UTILITIES

Son of Doge's vision is to offer a platform with a constant roll out of thought provoking utility. Aiming to bridge the space between meme and utility, we will create the most unique crypto community this space has ever seen!

A coin with true utility that will offer solutions through our ever-evolving platform. The below utilities will roll out Q4 2021 and throughout 2022.

Staking Platform

We have developed a staking platform that allows people to stake their tokens and receive a high APY return at a variable rate, we activate this utility periodically to reward our holders from time to time

UTILITY PLATFORM

Utilium is our new feature rich platform which will boast a huge array of features. Launching initially with a multi-chain launchpad, and a selection of exclusive features. We will cater for all projects to launch with a fair, transparent and cost effective solution. Each month more and more features will be released, servicing every aspect of a project launch. In short, a one stop shop where every service will be offered directly through Utilium.

No third party involvement, complete trust and risk free

EXCLUSIVE NFT COLLECTION

We will have a very rare interactive exclusive range of NFT's. These will be unique Son of Doge NFT's that holders can purchase to hold, trade, sell or use in our future Metaverse.

METAVVERSE DEVELOPMENT

Son of Doge Metaverse will allow holders of NFT's to be fully immersive using each NFT as an Avatar. Future development TBC
